

AIMS Project Update February 1, 2019

The project has completed the Imagine Phase on time and under budget. The orientation event for the Deliver phase launch is February 5, 2019 in Saskatoon.

A review of deliverables for all streams occurred the week of January 28, 2019, which concludes the design deliverables for the Imagine phase. The Deliver phase now begins the process of implementing the deliverables identified in the Imagine phase. This involves developing and testing scenarios to meet the identified objectives. These testing phases occur in four-week “sprints” of building, testing, and revising, as needed.
