

## Administrative Information Management System (AIMS)

### **AIMS Project Report – May 7, 2019**

The project is halfway through the third development or “sprint cycle”, with 2 weeks remaining. Additional resources have been added to the teams to gain traction on the work to meet scheduled output.

The Organizational Change Management team held three successful webex sessions this past week to kick off the Change Leaders Network to inform leaders of their role in supporting change within the organization. The sessions involved Executive Directors and Directors of the Saskatchewan Health Authority and were well-attended with 250 participants. Further sessions are planned to engage partner organizations individually.
